Maternity and Paternity at Work Laura Addati 2014-05-13 This report provides a picture of where we stand and what we have learned so far about maternity and paternity rights across the world. It offers a rich international comparative analysis of law and practice relating to

maternity protection at work in 185 countries and territories, comprising leave, cash benefits, employment protection and non-discrimination, health protection, breastfeeding arrangements at work and childcare. Expanding on previous editions, it is based on an extensive set of new legal and statistical indicators, including coverage in law and in practice of paid maternity leave as well as statutory provision of paternity and parental leave and their evolution over the last 20 years. The report also takes account of the recent economic crisis and austerity measures. It shows how well national laws and practice conform to the ILO Maternity Protection Convention, 2000 (No. 183), its accompanying Recommendation (No. 191) and the Workers with Family Responsibilities Convention, 1981 (No. 156), and offers guidance on policy design and

implementation. This report shows that a majority of countries have established legislation to protect and support maternity and paternity at work, even if those provisions do not always meet the ILO standards. One of the persistent challenges is the effective implementation of legislation, to ensure that all workers are able to benefit from these essential labour rights.

Consuming Habits Jordan Goodman 2014-04-08
Covering a wide range of substances, including opium, cocaine, coffee, tobacco, kola, and betelnut, from prehistory to the present day, this new edition has been extensively updated, with an updated bibliography and two new chapters on cannabis and khat. Consuming Habits is the perfect companion for all those interested in how different cultures have defined drugs across the ages. Psychoactive substances have been

central to the formation of civilizations, the definition of cultural identities, and the growth of the world economy. The labelling of these substances as 'legal' or 'illegal' has diverted attention away from understanding their important cultural and historical role. This collection explores the rich analytical category of psychoactive substances from challenging historical and anthropological perspectives.

Implementing Inclusive Education Richard Rieser 2012 This revised and expanded second edition of *Implementing Inclusive Education* shows how Commonwealth countries are attempting to undertake inclusion in education, and will encourage all those charged with ensuring education for all to make certain that disabled children are fully included in all aspects of the education system.

Home Blood Pressure Monitoring

George S. Stergiou 2019-10-31 Hypertension remains a leading cause of disability and death worldwide. Self-monitoring of blood pressure by patients at home is currently recommended as a valuable tool for the diagnosis and management of hypertension.

Unfortunately, in clinical practice, home blood pressure monitoring is often inadequately implemented, mostly due to the use of inaccurate devices and

inappropriate methodologies. Thus, the potential of the method to improve the management of hypertension and cardiovascular disease prevention has not yet been exhausted. This volume presents the available evidence on home blood pressure monitoring, discusses its strengths and limitations, and presents strategies for its optimal implementation in clinical practice. Written by distinguished international experts, it offers a complete source of information and guide for practitioners and researchers dealing with the management of hypertension.

Suggestions to Medical Authors, and A. M. A. Style Book American Medical Association 1922
The Trauma Golden Hour Adonis Nasr 2019-11-27 The Golden Hour is a well-established concept in emergency medicine, related to the critical period of one hour after an injury,

accident or trauma. This term implies that the mortality rates increase substantially if efficient care is not provided within 60 minutes after the trauma. This book is intended as a practical manual in Trauma Care within the context of the golden hour, addressing all trauma types and all body parts. Readers will find essential decision-making algorithms and protocols with commentary for traumas, along with easily accessible information on how to treat patients in a very practical and handy fashion. Furthermore, the content is presented in a didactic way suitable for a wide audience, from medical students who want to learn about the basics of trauma care to experienced surgeons seeking a comprehensive guide to trauma-related interventions. The book combines contributions from experts at two renowned Trauma Centers,

the Hospital do Trabalhador at Curitiba, Brazil, and the Ryder Trauma Center in Miami, USA. Therefore, considering the different local environments and resources, the book provides distinct perspectives for several injuries, presenting the state of the art in Trauma Care. The diversity of perspectives in this book contributes to a global health care approach suitable for trauma-related events from developed countries to remote areas. The Trauma Golden Hour – A Practical Guide celebrates the Centennial Anniversary of the Federal University of Parana (Brazil), the 25th Anniversary of the Ryder Trauma Center (USA) and the 20th Anniversary of the Hospital do Trabalhador (Brazil).

Mosby's Handbook of Herbs & Natural Supplements - E-Book

Linda Skidmore-Roth
2009-04-27 Access the most reliable information on

herbs and alternative medicines from trusted author, Linda Skidmore-Roth, in Mosby's Handbook of Herbs and Natural Supplements! Reviewed by nurses and herbalists alike, this authoritative resource presents herb and supplement profiles in a convenient, A-Z format for fast reference. This edition's updated, streamlined design helps you find information quickly, and a new systematic pregnancy and breastfeeding classification offers the latest guidelines for this special client population. Detailed monographs for 300 commonly used herbal products and natural supplements include vital information on the products you'll encounter with your clients. Updated references and information from new studies make this a reliable source for herbal content. Alert icons warn you of potentially dangerous reactions that could threaten your clients'

health. Popular Herb, Pregnancy, and Pediatric icons help you find relevant content quickly for common herbs and herbs for special populations. Quick-reference format presents consistent monographs for each herb and makes it easy to find the information you need. Herbal Resource appendix, Drug/Herb Interaction appendix, Pediatric Herbal Use appendix, and a list of abbreviations provide essential resources and expanded herbal material in one convenient spot. A comprehensive index of herbal terms allows you to look up an herb by its common or scientific name, as well as by condition. A pregnancy classification system from the Australian Therapeutic Goods Administration allows you to analyze herbs individually and provides a consistent formula to decide which herbs should be used. Updated content throughout includes the latest uses,

actions, dosages, contraindications, side effects/adverse reactions, interactions, pharmacology, alerts, and references. Pediatric Herbal Use appendix covers uses, guidelines, and expanded pediatric and adolescent information for 32 herbs. Drug/Herb Interaction appendix lists known drug and herb interactions for herbs included in the handbook to ensure client safety.

Historical Painting Techniques, Materials, and Studio Practice Arie Wallert 1995-08-24 Bridging the fields of conservation, art history, and museum curating, this volume contains the principal papers from an international symposium titled "Historical Painting Techniques, Materials, and Studio Practice" at the University of Leiden in Amsterdam, Netherlands, from June 26 to 29, 1995. The symposium—designed for art historians,

conservators, conservation scientists, and museum curators worldwide—was organized by the Department of Art History at the University of Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in Amsterdam. Twenty-five contributors representing museums and conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest art historical research and scientific analyses of original techniques and materials, as well as historical sources, such as medieval treatises and descriptions of painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English

churches, Chinese paintings on paper and canvas, and Tibetan thangkas. Color plates and black-and-white photographs illustrate works from the Middle Ages to the 20th century.

Handbook of Nutraceuticals

Volume I Yashwant

Vishnupant Pathak

2009-11-24 As soon as Dr.

Stephen DeFelice coined

the phrase nutraceutical,

product and supplement

developers swung into

action. Yet among the

numerous books available

on nutraceuticals, there is

none that systematically

lists, categorizes, and

analyzes nutraceutical

extracts and formulations in

a pharmacopoeia-like

manner. Handbook of

Nutraceuticals, Volume 1:

Ingredients, Formulations,

and Applications lists

information on many

ingredients used in

nutraceuticals, developing

their formulations and

applications. The book

includes contributions from

experts with pharmaceutical

backgrounds, providing an

examination of nutraceuticals from a pharmaceutical perspective.

Building a foundation with

coverage of historical

background, definitions,

and challenges, the book

offers insight into

nutraceutical ingredients

from plant, animal, and

mineral origin. It then

covers the characterization

of nutraceuticals'

physicochemical, analytical,

pharmacological, and

pharmacokinetic

classification, followed by

information on regulatory

requirements. The book

highlights applications in

cardiovascular disease,

bone and joint treatments,

diabetes management,

weight management, skin

health, probiotics and

prebiotics, tranquilizing

medicinal plants, dietary

foods, and more. Interest in

new diet regimens and new

products for increased

health and longevity will

continue to grow, giving

dietary supplements an

increasing amount of

cupboard space in most households. With quality of content unsurpassed by many resources, the book discusses the characterization processes for nutraceuticals based on the contributors' experience in pharmaceuticals. It then explores how those proven techniques may be applied to the development and manufacture of nutraceutical products.

Hidden and Lesser-known Disordered Eating Behaviors in Medical and Psychiatric Conditions

Emilia Manzato 2021-10-01
This book provides up-to-date information on lesser known eating disorders (EDs) and eating related disorders. EDs and eating-related disorders include a highly heterogeneous group of syndromes and symptoms characterized by abnormal eating and weight control behaviors that can appear in all genders and ages. EDs can lead to high rates of morbidity and mortality, especially if they are misdiagnosed and untreated. The risk of

underestimation is high for the lesser-known ED, and when unhealthy eating behaviors appear in unusual situations, such as some medical and psychiatric pathologies, adults and the elderly, sexual minorities etc. The volume examines EDs in specific populations (the elderly, males, infants and toddlers, sexual minorities, etc.). Several chapters explore in detail lesser-known EDs (anorexia athletica, avoidant/restrictive food intake disorder, chewing and spitting, EDs by proxy, EDs after bariatric surgery, muscle dysmorphia, night-eating syndrome, nocturnal sleep-related eating disorder, orthorexia nervosa, pica, rumination disorder, etc.). Finally, other chapters address features of unhealthy eating and weight control behaviors associated with medical diseases (achalasia, craniopharyngioma, cystic fibrosis, cyclic vomiting syndrome, diabetes,

dysphagia, Kleine-Levin syndrome, Klinefelter syndrome, Parkinson disease, Prader-Willi syndrome, Turner syndrome, etc.) The book will be a valuable resource for all health professionals who work in the fields of psychiatry, clinical psychology, eating disorders, obesity, medicine, clinical nutrition, public health, and prevention, allowing them to broaden their understanding of these disorders, and to enhance their clinical ability to diagnose them.

The Media Book Chris Newbold 2002 The Media Book provides today's students with a comprehensive foundation for the study of the modern media. It has been systematically compiled to map the field in a way which corresponds to the curricular organization of the field around the globe, providing a complete resource for students in

their third year to graduate level courses in the U.S.

Fuel Cell Handbook (Seventh Edition) Eg&g Technical Services Inc 2016-05-08 Fuel cells are one of the cleanest and most efficient technologies for generating electricity. Since there is no combustion, there are none of the pollutants commonly produced by boilers and furnaces. For systems designed to consume hydrogen directly, the only products are electricity, water and heat. Fuel cells are an important technology for a potentially wide variety of applications including on-site electric

power for households and commercial buildings; supplemental or auxiliary power to support car, truck and aircraft systems; power for personal, mass and commercial transportation; and the modular addition by utilities of new power generation closely tailored to meet growth in power consumption. These applications will be in a large number of industries worldwide. In this Seventh Edition of the Fuel Cell Handbook, we have discussed the Solid State Energy Conversion Alliance Program (SECA) activities. In addition, individual fuel cell technologies and other supporting materials have been updated.

[American Psychiatric Association Practice Guidelines](#) American Psychiatric Association 1996 The aim of the American Psychiatric Association Practice Guideline series is to improve patient care. Guidelines provide a

comprehensive synthesis of all available information relevant to the clinical topic. Practice guidelines can be vehicles for educating psychiatrists, other medical and mental health professionals, and the general public about appropriate and inappropriate treatments. The series also will identify those areas in which critical information is lacking and in which research could be expected to improve clinical decisions. The Practice Guidelines are also designed to help those charged with overseeing the utilization and reimbursement of psychiatric services to develop more scientifically based and clinically sensitive criteria.

The 20-Minute Body Brett Hoebel 2015-03-24 The former Biggest Loser star and celebrity trainer presents a high intensity workout and eating plan that delivers big results in just 20 minutes a day. From his days as a trainer on The Biggest Loser, Bret Hoebel knows that when people log hours on a treadmill, they'll lose weight. But he also knows that most of his clients don't have the schedule or the desire to spend that much time at the gym. And the truth is—the number of minutes you spend working out isn't the key to weight loss: intensity is. Time and again, Brett meets clients who've been making the same mistakes—not only are they focused on the clock, but they're also concentrating on fat burn and pounds lost as markers of success. And

with a fat-first focus on losing weight, plateaus come quickly and often. But it's not about fat, it's about muscle. In The 20-Minute Body, Brett explains why the key to long-term weight loss is building muscle. The more lean muscle your body has, the more calories your body will burn at rest. Metabolic muscle is the secret to fast metabolism. And all you need is 20 minutes a day to create it. Additionally, when you focus on inches, not pounds, you'll find that you fit into your clothes better and love the shape of your body. Weight is misleading—muscle weighs more than fat, but it takes up far less room. So throw away the scale and invest in a tape measure to track your success. The 20-Minute Body will help you lose 20 inches—from around your stomach, hips, thighs, and arms—in just 20 days. All it takes is 20 minutes of exercise, paired with 20-minute meals that are

focused on nutrient quality, not calorie counts. Brett offers readers sample meal plans and recipes for meals, snacks, and desserts the whole family will love—all of which can be thrown together in 20 minutes or less.

Jeff Seid 2017-01-15

Aesthetics is much more than just being physically appealing. It is a lifestyle, a way of life. One does not attain aesthetic perfection overnight. It takes years of consistency to shape your physique into a masterpiece, but more, it takes you to change your entire outlook on life.

Theories of the Information Society

Frank

Webster 2002 Popular opinion suggests that information has become a distinguishing feature of the modern world. Where once economies were built on industry and conquest, we are now instead said to be part of a global information economy. In this new and thoroughly revised edition of his popular book, author Webster brings his work up-to-date both with new theoretical work and with social and technological changes - such as the rapid growth of the internet and accelerated globalization - and reassesses the work of key theorists in light of these changes. This book is essential reading for students of contemporary social theory and anybody interested in social and technological change in the post-war era.

Handbook on Battery Energy Storage System
Asian Development Bank
2018-12-01 This handbook serves as a guide to deploying battery energy storage technologies, specifically for distributed energy resources and flexibility resources. Battery energy storage technology is the most promising, rapidly developed technology as it provides higher efficiency and ease

of control. With energy transition through decarbonization and decentralization, energy storage plays a significant role to enhance grid efficiency by alleviating volatility from demand and supply. Energy storage also contributes to the grid integration of renewable energy and promotion of microgrid.

Pesticidal Plants Philip C. Stevenson 2020-05-27 The global biodiversity and climate emergencies demand transformative changes to human activities. For example, food production relies on synthetic, industrial and non-sustainable products for managing pests, weeds and diseases of crops. Sustainable farming requires approaches to managing these agricultural constraints that are more environmentally benign and work with rather than against nature. Increasing pressure on synthetic products has reinvigorated

efforts to identify alternative pest management options, including plant-based solutions that are environmentally benign and can be tailored to different farmers' needs, from commercial to small holder and subsistence farming. Botanical insecticides and pesticidal plants can offer a novel, effective and more sustainable alternative to synthetic products for controlling pests, diseases and weeds. This Special Issue reviews and reports the latest developments in plant-based pesticides from identification of bioactive plant chemicals, mechanisms of activity and validation of their use in horticulture and disease vector control. Other work reports applications in rice weeds, combination biopesticides and how chemistry varies spatially and influences the effectiveness of botanicals in different locations. Three reviews assess wider

questions around the potential of plant-based pest management to address the global challenges of new, invasive and established crop pests and as-yet underexploited pesticidal plants.

British Social Attitudes

28 Alison Park 2012-03-21

The annual British Social Attitudes survey is carried out by Britain's largest independent social research organisation, NatCen Social Research. It provides an indispensable guide to political and social issues in contemporary Britain, summarising and interpreting data from the most recent nationwide survey, as well as drawing invaluable comparisons with the findings of previous years to provide a richer picture and deeper understanding of changing British social values. The 28th Report sits on a cusp: reflecting people's experiences of Britain under Labour, but also informed by their hopes, fears and

expectations of life under the Coalition. Areas covered include an analysis of Britain's democratic health, as well as an exploration of views about key policy areas such as the NHS, education, transport and welfare. It also examines the extent to which attitudes to the environment are changing over time, as well as Britain's changing religious identity. The British Social Attitudes survey report is essential reading for anyone seeking a guide to the topical issues and debates of today or engaged in contemporary social and political research.

The Theory of the Avant-garde Renato Poggioli 1981

Convinced that all aspects of modern culture have been affected by avant-garde art, Poggioli explores the relationship between the avant-garde and civilization. Historical

parallels and modern examples from all the arts are used to show how the avant-garde is both symptom and cause of many major extra-aesthetic trends of our time, and that the contemporary avant-garde is the sole and authentic one.
