must be skilled users of informatics tools to meet federal mandates and succeed under value-based contracts that demand higher quality and increased patient satisfaction but at lower cost. Yet, most have little formal training in these systems and technologies. Providers face system selection issues with little unbiased and insightful information to guide them. Patient engagement to promote wellness, prevention and improved outcomes is a requirement of Meaningful Use Stage 2 and is increasingly supported by mobile devices, apps, sensors and other technologies. Care providers need to provide guidance and advice to their patients and know how to incorporate as they generate into their care. The one-patient-at-a-time care model is being rapidly supplemented by new team-, population- and public health-based models of

care. As digital data becomes ubiquitous, medicine is changing as research based on that data reveals new methods for earlier diagnosis, improved treatment and disease management and prevention. This book is clearly written, up-to-date and uses real world examples extensively to explain the tools and technologies and illustrate their practical role and potential impact on providers, patients, researchers, and society as a whole.

Understanding Urban Politics Timothy B. Krebs 2020 In *Understanding Urban Politics: Institutions, Representation, and Policies*, Timothy B. Krebs and Arnold Fleischmann introduce a framework that

focuses on the role of institutions in establishing the political "rules of the game," the representativeness of city government, the influence of participation in local democracy, and how each of these features influences the adoption and implementation of public policies. Part 1 lays the groundwork for the rest of the book by exploring the many meanings of "urban," analyzing what local governments do, and providing a history of American urban development. Part 2 examines the organizations and procedures that are central to urban politics and policy making: intergovernmental relations, local legislatures, and the local executive branch. Part 3 looks at elections and voting, local campaigns, and non-voting forms of participation. The four chapters in Part 4 focus on the policy process and the delivery of local

services, local government finances, "Building the City" (economic development, land use, and housing), and policies affecting the quality of life (public safety, the environment, "morality" issues, and urban amenities). Krebs and Fleischmann bolster students' learning and skills with guiding questions at the start of each chapter, which ends with key terms, a summary, discussion questions, and research exercises. The appendix and website aid these efforts, as does a website for instructors.
