**Adult Health Nursing** Barbara Lauritsen Christensen 2003 An ideal companion text to Foundations of Nursing, this clearly-written, colorful, and attractively-designed resource prepares the LPN/LVN for today's medical-surgical nursing practice. Content focuses on the nursing process and nursing actions, addressing contemporary issues that include care of the older adult, cultural considerations,

delegation to unlicensed assistive personnel, patient/family teaching, and home/long-term care. Used together, these two texts provide all the content covered in the entire LPN/LVN curriculum. The nursing process is applied consistently and logically to the discussion of disorders and appears in complete summary form at the end of every chapter. Full-color art, photography, and design add visual appeal to text content. An Overview of Anatomy and Physiology opens all body systems chapters. Objectives are divided into Anatomy & Physiology and Medical-Surgical categories. Nursing Care Plans are developed around specific case studies with an emphasis on patient goals, outcomes, and questions to promote critical thinking. Clinical Pathways reflect collaborative care. Assessment is separated out into Subjective and Objective Data. Nursing Diagnosespaired with disorder-appropriate Nursing Interventions are screened and highlighted in the text. Critical Thinking Questions are found at the end of every Nursing Care Plan. Therapeutic Dialogue boxes focus on communication through real-life examples of nurse-patient dialogue. Patient Teaching boxes examine discharge instructions and health promotion for patients and families. Home Health Considerations boxes discuss issues facing patients and caregivers in the home care setting. Older Adult Considerations boxes bring a gerontologic perspective to the analysis of specific disorders. Cultural and Ethnic Considerations boxes teach students about specific cultural preferences and how to address the needs of cultural diversity when planning nursing care. Medications tables provide quick access to action, dosage, precautions, and nursing considerations for commonly used drugs. Key Terms appear with phonetic pronunciations at the beginning of the chapter, are in color at first mention, and are defined in the Glossary. Pronunciations have been reviewed by an English as a Second Language (ESL) consultant TOC reorganized based on reviewers' suggestions to improve accessibility of content Complementary and Alternative Therapy boxes in nearly every chapter give a breakdown of specific therapies, along with precautions and possible side effects End-of-chapter pedagogy is reorganized, with Key Points and Chapter Challenge (Study Questions) immediately following the end of the narrative Chapter Challenge ends the chapter with NCLEX-style multiple-choice Study Questions References and Suggested Readings are revised and updated and, where applicable, are followed by Additional Resources such as agencies and websites. Grouped by chapter at the end of the book Enhanced and upgraded ancillary package

*Contemporary Pediatric Nursing* Cathleen S. Opperman 1998 This text provides comprehensive coverage of all aspects of pediatric nursing relevant to the practical/vocational nurse. Discussion of current issues and trends includes family and cultural considerations, as well as patient/family teaching and community/home care. A separate unit on growth and development focuses on health promotion and nutrition, providing a solid foundation for understanding nursing care for common disorders. The text is presented in a clear, readable writing style to hold the students' interest and promote understanding. Nursing care stresses assessment and intervention based on NANDA diagnoses. Numerous boxes, tables, and illustrations add visual appeal, as well as support and summarize the narrative. Common disorders are presented by body system; this organization provides a logical framework that can be blended with a medical-surgical text in programs using a life-span approach. Nursing process framework includes data collection, goals and expected outcomes, and nursing interventions. Stresses the LPN/LVN role in gathering comprehensive assessment data to assist in developing diagnoses and evaluating effectiveness of care. Focus on family teaching encourages health promotion and self care. Addresses cultural/religious considerations to ensure that the child and family's beliefs and practices are incorporated in care. Discusses home and community-based care to prepare students to work in these now common settings. Pediatric Pearls provide practical tips and alert students to important considerations for care. Case studies and corresponding care plans provide clear guidelines for individualizing care to meet specific patient needs. Learning aids in each chapter include learning objectives, key terms, and key concepts to help students focus on essential information; critical thinking questions included at the end of each chapter promote the development of decision-making skills.

**Professional Skills for Leadership** Michelle Morrison 1993 Prepares students for the advanced practice roles of leadership and management. Its practical approach focuses on seven key management techniques and develops each in a variety of settings and situations. The emphasis is on management as working with people, not with products or services.

*Fundamental Nursing* Grace Cole 1996 The second edition of FUNDAMENTAL NURSING CONCEPTS AND SKILLS has been updated and revised to provide comprehensive coverage of the basic concepts and skills practical/vocational nurses must master. Contents is logically organized in four units that cover foundations of nursing practice, factors that influence health and illness, basic nursing skills, and basic patient needs. To address the increased focus on nursing process, each chapter begins with an overview of how the process applies to specific content. Nursing care plans demonstrate how to translate the basic principles and interventions into practice.

This four-color textbook is available separately or packaged with FOUNDATIONS at a competitive price. \* Therapeutic Dialogues in every chapter provide practical guidelines for effective communication. \* Case study-based Care Plans focus on patient outcomes and the latest NANDA nursing diagnoses. \* Critical Thinking Questions follow each care plan to promote clinical decision making abilities. \* Patient/Family Teaching is stressed in boxes and narrative to highlight this vital nursing responsibility. \* Medication Tables provide information on action, dosage, side effects, and nursing considerations for commonly used drugs. \* Nursing process framework provides a logical, consistent format. \* Easy-to-understand writing style enhances learning and understanding. \* Numerous boxes and tables highlight and summarize important content. \* Hundreds of full color illustrations and photographs to promote learning.

**Saunders Textbook of Medical Assisting** Diane M. Klieger 2005 This comprehensive and visually appealing text covers all aspects of both the AAMA and AMT national curricula for medical assisting, including medical terminology, anatomy & physiology, and pathophysiology. The text is written in a reader-friendly style, and integrates features designed to foster a greater awareness for students of the consequences of their actions on the job, as well as to develop greater empathy for the patient's experience. A recurring Ripples on the Pond analogy emphasizes this "ripple," or consequences effect. Case scenarios at the beginning of chapters challenge students to put the chapter content into a real-world perspective, with follow-up questions at the end of chapters that are designed for self-reflection, homework assignments, or class discussion. An integrated package includes an interactive skills software program in the text, a student workbook with recall, application, and critical thinking exercises, a complete instructor's package, and a companion website. A Ripples on the Pond theme is designed to help students become more aware of the consequences and the cause-and-effect of their actions on the job. This theme is reinforced visually, and in content features throughout the text. Patient-Centered Professionalism boxes throughout chapters help students think about the chapter content in the perspective of the patient's experience so they can develop empathy for the patient and consider how their actions will be experienced by the patient. Coverage of national curriculum competencies, with a listing of the AAMA and RMA competencies in the instructor's package. A correlation grid of chapter objectives to curriculum competencies assures complete compliance with accreditation requirements. Two special chapters on student skills and employment provide excellent advice on how to get the most out of the learning experience, and how to get a job and succeed in one's career. Coverage is included of the three prerequisites of any medical assisting program: medical terminology, A&P, and pathology - making this an all-encompassing text that renders the purchase of additional texts unnecessary. Heavily illustrated step-by-step procedures, with charting examples and rationales, promote better understanding of how to properly perform all clinical and administrative procedures. Weighted competency checklists for all skills are in the student workbook. What Would You Do? case studies presented at the beginning of each chapter are revisited at the chapter end, along with questions to help students develop their critical thinking skills. These scenarios and questions also make excellent class or small-group discussions, or homework assignments. Suggested responses are in the instructor's package. For Further Exploration boxes suggest topics for further Internet research. Internet research activities are available in the student workbook, with active links on the companion website that are organized by chapter. Summary Keys offer a bulleted review of important points for each learning objective, reinforcing the content students must master for each chapter. Companion online course follows a generic organizational structure, with reading assignments keyed to the Klieger textbook. This course can either stand alone as true distance education courses, or can be used effectively to reinforce a traditional classroom course. An online mentor steps students through a virtual externship as they meet realistic patients, physicians, and co-

workers while learning the basic theory and practicing the key curriculum skills.
