Solved Question paper of Another unique feature of the book is the division of its General Awareness section into separate chapters on History, Geography, Polity, Economy, General Science, Miscellaneous topics and Current Affairs.

Sino-Mongolian Relations, 1949-2004 Shakti Madhok 2005 "Relations between two sovereign and neighbourly states is always a ticklish problem, Mongolia a country landlocked between China on the one side and Russia on the other had a hoary and belligerent past. In thirteenth and fourteenth centuries it ruled over almost one - third of the civilized world including China. Mongolia's relationship with China had a chequered history and in fact it always needed an extraordinary efforts on the part of Mongolia to maintain correctâ if not cordial ties wirh China. (Excerpts from the book). China being a civilizational state has had a foreign affairs agenda of its own. At times it was tune in with the rest of the Socialist bloc but most of the time it followed an independent line. Political dominance of the Soviet Union over Mongolia was not acceptable to China which had exercised suzerain rights over Mongolia for more than a century. The situation became worse after the Sino- Soviet schism and Mongolia toeing the Soviet line. Mongolia tried to play China against the Soviet Union and vice-versa to meet its security requirements and overcome its economic under-development and above all to maintain its distinct identity in the comity of nations. Traditionally being a center of both Pan - Buddhist and Pan - Mongol movements, it tried to maintain cutral togetherness with both the Inner Mongolian Autonomous Region of China and the Buryat Soviet Socialist Republic of the Soviet Union. In the post-Mao period, the Sino-Soviet schism was perceived as a Maoist fallacy and earnest attempts were made by the post-Mao genre of Chinese leaders to free foreign policy from Maoist agenda. This coupled with openness in the Soviet Union resulted in normalization of Sino-Soviet relations. How this contributed to normalization of relations between China and Mongolia and the subsequent emergence of Mongolia as a democratic state is brought out at length in this study. The last chapter also throws light on what can be the future prospects for relations between two neighbours China and Mongolia. "

Regional Integration in Africa Hamdy A. Hassan 2011 Regional Integration in Africa Bridging the North-Sub-Saharan Divide came about as a research project conducted by the Africa Institute of South Africa and examines the North African countries' strategies of involvement in the African continent, and their integration initiatives. The book looks at major issues involving Egypt, Libya, Tunisia, Algeria, Morocco and Mauritania. These countries, in most cases, have been treated as separate from sub-Saharan Africa. However, the historical reality and economic and political interests indicate that the North African countries have been and still are closely connected with the rest of the African continent. Egypt, for example, was one of the leading countries in the African unity movement, and, together with Libya, has contributed to the restructuring of the African continental organisation and the establishment of the African Union. The book consists of two parts. The first part includes five chapters written in English, the second part of the book comprises six chapters written in Arabic.

Siberia A. J. Haywood 2010 Before Russians crossed the Urals Mountains in the sixteenth century to settle their "colony" in North Asia, they heard rumors about bountiful fur, of bizarre people without eyes who ate by shrugging their shoulders and of a land where trees exploded from cold. This region of frozen tundra, endless forest, and humming steppe between the Urals and the Pacific Ocean was a vast, strange, and frightening paradise. It was Siberia. Siberia is a cradle of civilizations, the birthplace of ancient Turkic empires and home to the cultures of indigenes, including peoples whose ancestors migrated to the Americas. It was a promised land to which bonded peasants could flee their cruel masters, yet also a snow-covered "white hell" across which exiles shuffled in felt shoes and chains. In Stalin's era, Siberia became synonymous with the gulag; today, it is a vast region of bustling metropolises and magnificent landscapes: a place where the humdrum, the beautiful, and the bizarre ignite the imagination. Tracing the historical contours of Siberia, A. J. Haywood offers a detailed account of the architectural and cultural landmarks of cities such as Irkutsk, Tobolsk, Barnaul, and Novosibirsk. MAGNIFICENT RIVERS AND LAKES: Lake Baikal, the Ob, Irtysh, Yenisey, Angara, Lena and Amur rivers. Writer Anton Chekhov described some, polar explorer Fridtjof Nansen and the eccentric British merchant captain Joseph Wiggins navigated others. THE CITIES AND THE RAILWAY: High fashion and low life, traffic-choked streets, and chimney stacks. Siberia's cities bring a madding crowd far into the remote taiga-linked by the Trans-Siberian Railway, the nineteenth-century "camel track." MYSTICS, MOUNTAINS AND ANCIENT CIVILIZATIONS Nikolay Rerikh sought the mystical kingdom of Shambhala here, Russian writer Valentin Rasputin was confused by its beauty, while local Altaians themselves see their republic of mountains and steppe as a Central Asian heaven on earth.

Late Quaternary Climate Change and Human Adaptation in Arid China D.B. Madsen 2011-09-22 Due to political pressures, prior to the 1990s little was known about the nature of human foraging adaptations in the deserts, grasslands, and mountains of north western China during the last glacial period. Even less was known about the transition to agriculture that followed. Now open to foreign visitation, there is now an increasing understanding of the foraging strategies which led both to the development of millet agriculture and to the utilization of the extreme environments of the Tibetan Plateau. This text explores the transition from the foraging societies of the Late Paleolithic to the emergence of settled farming societies and the emergent pastoralism of the middle Neolithic striving to help answer the diverse and numerous questions of this critical transitional period. * Examines the transition from foraging societies of the Late Paleolithic to the emergence of settled farming societies and the emergent pastoralism of the middle Neolithic * Explores explanatory models for the links between climate change and cultural change that may have influenced the development of millet agriculture * Reviews the relationship between climate change and population expansions and contradictions during the late Quaternary
