[Property and Political Order in Africa](#) Catherine Boone 2014-02-10 In sub-Saharan Africa, property relationships around land and access to natural resources vary across localities, districts and farming regions. These differences produce patterned variations in relationships between individuals, communities and the state. This book captures these patterns in an analysis of structure and variation in rural land tenure regimes. In most farming areas, state authority is deeply embedded in land regimes, drawing farmers, ethnic insiders and outsiders, lineages, villages and communities into direct and indirect relationships with political authorities at different levels of the state apparatus. The analysis shows how property institutions - institutions that define political authority and hierarchy around land - shape dynamics of great interest to scholars of politics, including the dynamics of land-related competition and conflict, territorial conflict, patron-client relations, electoral cleavage and mobilization, ethnic politics, rural rebellion, and the localization and 'nationalization' of political competition.

LGBT Families Nancy J. Mezey 2015 Nancy J. Mezey's LGBT Families presents a comprehensive yet accessible understanding of LGBT families today by drawing upon and making sense of the burgeoning scholarly literature about LGBT families from the late twentieth and early twenty first centuries. It pays particular attention to how structures of race, class, gender, sexuality, and age shape LGBT families, and how members of such families negotiate the social landscapes within which they exist. The book will help readers better understand the formation, experiences, challenges, and strengths of LGBT families, and addresses two main questions: Why are new family forms so threatening to certain groups of people in society? and How are new family forms beneficial to the society in which they exist?

In Conflict and Order D. Stanley Eitzen 2004 Broadly viewing the global economy as a political competition that produces winners and losers, "International Political Economy" holistically and accessibly introduces the field of IPE to readers with limited background in political theory, history, and economics. This book surveys major interests and institutions and examines how state and non-state actors pursue wealth and power. Emphasizing fundamental economic concepts as well as the interplay between domestic and international politics, "International Political Economy" not only explains how the global economy works; it also encourages readers to think critically about how economic policy is made in the context of globalization.

[Environment Concerns in Rights-of-Way Management 8th International Symposium](#) John W. Goodrich-Mahoney 2011-08-11 The management of rights-of-way by electric and telephone utilities, highway departments, gas pipeline companies, and railroads around the world is guided and constrained by policies and regulations to protect the environment. Companies that manage rights-of-way are required to comply with these regulations, and are seeking the most cost-effective management practices that, at the same time, demonstrate stewardship of the environment. Protection of biodiversity and sustainable development are especially important as national goals in many countries, and rights-of-way managers are seeking practical ways to include public participation in their operations. * Addresses environmental issues in rights-of-way planning and management * Provides a forum for information exchange among various agencies, industries, environmental consultants, and academic organizations * Presents peer-reviewed papers to help achieve a better understanding of current environmental issues involved in rights-of-way management

[The Future of the Public's Health in the 21st Century](#) Institute of Medicine 2003-02-01 The anthrax incidents following the 9/11 terrorist attacks put the spotlight on the nation's public health agencies, placing it under an unprecedented scrutiny that added new dimensions to the complex issues considered in this report. The Future of the Public's Health in the 21st Century reaffirms the vision of Healthy People 2010, and outlines a systems approach to assuring the nation's health in practice, research, and policy. This approach focuses on joining the unique resources and perspectives of diverse sectors and entities and challenges these groups to work in a concerted, strategic way to promote and protect the public's health. Focusing on diverse partnerships as the framework for public health, the book discusses: The need for a shift from an individual to a population-based approach in practice, research, policy, and community engagement. The status of the governmental public health infrastructure and what needs to be improved, including its interface with the health care delivery system. The roles nongovernment actors, such as academia, business, local communities and the media can play in creating a healthy nation. Providing an accessible analysis, this book will be important to public health policy-makers and practitioners, business and community leaders, health advocates, educators and journalists.

Diversity in Families Maxine Baca Zinn 1996 This highly regarded book treats diversity as the norm in family life, exploring the many varieties of familiar relationships in society today. This exploration of the socio-economic, cultural, and ethnic diversities in families views the family on both the macro and micro levels, examining the influence of larger social trends on personal experience, with particular focus on gender, race, class, and economic factors.

Conflict and Compromise in Multilingual Societies Kenneth Douglas McRae 1999 Conflict and Compromise, Volume 3: Finland examines historical and developmental patterns during the Swedish, Russian and post-independence periods of Finland's history. McRae outlines Finland's changing social structures, showing how the language groups have evolved within these structures in the twentieth century. He compares how Finnish-speaking and Swedish-speaking citizens perceive themselves and other language groups, as well as the similarities and differences in their views on political and social issues. Further, the book describes in detail the constitutional and institutional arrangements for languages in Finland's political and administrative system, as well as in education and the mass media.

Everyday Ethnicity in Sri Lanka Daniel Bass 2013 Focusing on notions of diaspora, identity and agency, this book examines ethnicity in war-torn Sri Lanka. It highlights the historical development and negotiation of a new identification of Up-country Tamil amidst Sri Lanka's violent ethnic politics. Over the past thirty years, Up-country (Indian) Tamils generally have tried to secure their vision of living within a multi-ethnic Sri Lanka, not within Tamil Eelam, the separatist dream that ended with the civil war in 2009. Exploring Sri Lanka within the deep history of colonial-era South Asian plantation diasporas, the book argues Up-country Tamils form a "diaspora next-door" to their ancestral homeland. It moves beyond simplistic Sinhala-Tamil binaries and shows how Sri Lanka's ethnic troubles actually have more in common with similar battles that diasporic Indians have faced in Fiji and Trinidad than with Hindu-Muslim communalism in neighbouring India, Pakistan and Bangladesh. Shedding new light on issues of agency, citizenship, displacement and replacement within the formation of diasporic communities and identities, this book demonstrates the ways that culture workers, including politicians, trade union leaders, academics and NGO workers, have facilitated the development of a new identity as Up-country Tamil. It is of interest to academics working in the fields of modern South Asia, diaspora, violence, post-conflict nations, religion and ethnicity.

Gendered Worlds Judy Root Aulette 2009 In Gendered Worlds, the authors use the sociological imagination to explore gender relations throughout the world. They look at how concrete forms of gender, race, class, and sexual inequality operate transnationally; examine the impact of globalization on local and everyday life experiences; and identify how local actors re-imagine social possibilities, resist injustice, and work toward change. Integrating theory with empirical studies that are of particular interest to college students-including research on violence, sports, and sexuality-the authors make gender concepts genuinely interesting and accessible. They also demonstrate how students can think critically about gender,

both within and beyond the classroom.Each chapter begins with an opening scenario about an individual experience of gender, and then traces how macro-level factors shape that micro experience. A section entitled "Gender Matters" follows each chapter to summarize the micro-macro connection.

World Political Challenges Egbert Jahn 2015-10-09 This volume focuses on several theoretical topics in world politics and analyzes prominent cases of global conflicts and their potential peaceful resolution. It covers issues such as the multiplication of nation states in the era of globalization, failed peace policy concepts in the 20th century, and the question of who was to blame for the outbreak of the Great War. The author discusses three influential patterns of interpretation of international relations and global events: the conviction that war is eternally rooted in human nature and history, the renewed interest in geopolitical thought and the theory of a clash between the predominantly religious-based civilizations. Finally, individual conflicts, such as the rebellion in several Arab countries, the potential war of intervention against Iran, the Indo-Pakistani-Chinese entanglement in the disputes over Kashmir and the present war in Ukraine are examined in detail.

The Faro Convention's role in a changing society Francesc Pla 2022-01-05 Council of Europe action in the field of cultural heritage targets promoting diversity and dialogue through access to heritage to foster a sense of identity, collective memory and mutual understanding within and between communities. The year 2021 marks the 10th anniversary of the entry into force of the Framework Convention on the Value of Cultural Heritage for Society, also known as the Faro Convention. The present publication shows that what emerged back in 2005 as a truly innovative approach is still relevant today and can also have an impact on issues beyond its traditional realm. This is illustrated through a set of articles that demonstrate the pertinence of the Faro Convention's approach to cultural heritage in addressing different aspects, ranging from democratic participation to tourism rethinking. The wide range of topics addressed and the numerous possibilities described by the various contributors suggest that the next ten years of the Faro Convention will be as challenging and rewarding as the decade that has elapsed since its entry into force.

Strangers in New Homelands Lewis Asimeng-Boahene 2013-02-21 Strangers in New Homelands is a collection of papers emanating from Annual International Conferences on the Social Reconstruction of the concept of "home" among immigrants in the diaspora. For many immigrants in the diaspora, the concept of "home", around which this conference has revolved, evokes confusion, fear, hopes, and aspirations. The presentations in this book therefore seek to throw light on what this concept means for many people who have uprooted themselves from their familiar environments and settled or seek to make new homes out of strange and unfamiliar environments. The contributors in this publication were drawn from the field of researchers on immigrant and refugee movements and settlements, education, community development and front-line immigrant and refugee settlement workers. They draw on experiences from their research, field practice vignettes, personal experiences and case work examples to highlight and explore the critical issues involved in the field of forced and voluntary migration and resettlement around the world, and the settlement of migrants and refugees in new societies. Cumulatively, the contributors examine the challenges of settlement, integration and adaptation that new comers face in host societies. The critical approaches and strong balance of research with applications show the implications of the issues for the profession of social work and allied fields. The scholarship presented here also highlights the implications of the issues discussed for further research and social policy development. Anyone interested in learning about the challenges and intricacies of the migration process around the world must read this book. It is highly recommended for politicians, policy makers, social work professionals, educators and organizations dealing with immigrants and refugees.

Decolonial Voices Arturo J. Aldama 2002 The interdisciplinary essays in Decolonial Voices discuss racialized, subaltern, feminist, and diasporic identities and the aesthetic politics of hybrid and mestiza/o cultural productions. This collection represents several key directions in the field: First, it charts how subaltern cultural productions of the US/ Mexico borderlands speak to the intersections of "local," "hemispheric," and "globalized" power relations of the border imaginary. Second, it recovers the Mexican women's and Chicana literary and cultural heritages that have been ignored by Euro-American canons and patriarchal exclusionary practices. It also expands the field in postnationalist directions by creating an interethnic, comparative, and transnational dialogue between Chicana and Chicano, African American, Mexican feminist, and U.S. Native American cultural vocabularies. Contributors include Norma Alarcón, Arturo J. Aldama, Frederick Luis Aldama, Cordelia Chávez Candelaria, Alejandra Elenes, Ramón García, María Herrera-Sobek, Patricia Penn Hilden, Gaye T. M. Principles and Recommendations for Population and Housing Censuses United Nations. Statistical Division 2008 The population and housing census is part of an integrated national statistical system, which may include other censuses (for example, agriculture), surveys, registers and administrative files. It

provides, at regular intervals, the benchmark for population count at national and local levels. For small geographical areas or sub-populations, it may represent the only source of information for certain social, demographic and economic characteristics. For many countries the census also provides a solid framework to develop sampling frames. This publication represents one of the pillars for data collection on the number and characteristics of the population of a country.

Social Problems D. Stanley Eitzen 2004 After years of diplomatic isolation Syria is emerging from the cold. Its government is a key Middle Eastern player, and will be a major element of any possible comprehensive Middle Eastern peace deal. To visit Syria is to become acquainted with one of the most rewarding destinations in the Middle East. Its historic attractions are stunning, and the Syrians are proud and gracious hosts; you can expect to be treated like a person and not just a tourist. Of course, there are always thorns with the roses: Syria's economy is inefficient, and its youth are frustrated; the strong-man political system that has held the country together does not encourage public intellectual life, but nor does it prevent young Syrians from debating with passion in private. The Syrian sense of tradition has preserved some of the bad along with the good, and society remains highly patriarchal. Despite such drawbacks, this is a country that's rich not only in resources, but also, and especially, in its people. American author Sarah Standish looks at Syria's long history and its present-day political realities. She describes the many subgroups that make up the population as well as what unites all Syrians. She offers practical tips for traveling and on what to expect when conducting business. You'll learn how people communicate with each other, and how you can communicate with them. The Syrians will never stop surprising you: get to know a few, and they will turn the stereotypes inside out several times over.
