Working for McDonald's in Europe Tony Royle 2004-08-02 The McDonald's Corporation is not only the largest system-wide sales service in the world, it is a phenomenon in its own right, and is

now recognized as the most famous brand in the world. By providing a detailed analysis of the extent to which the McDonald's Corporation adapts or imposes its labour relations policies in Europe, this volume represents a real life case study revealing the interaction between a global multi-national enterprise and the regulatory systems of a number of different European countries. Key features include: * an overview of the McDonald's Corporation's development and structure * an analysis of its corporate culture and the issues of franchising * an examination of key union strategies, including systems of co-determination, consultation and collective-bargaining * a chapter dealing specifically with European legislation, in particular the McDonald's European Works Council The author systematically analyzes the conflict between the McDonald's Corporation and the industrial relations systems of the European countries within which it operates, and exposes this conflict as an 'unequal struggle' between economic liberalism and collectivism.

Marketing Briefs: A Revision and Study

Guide Sally Dibb 2012-08-21 Complementing Dibb and Simkin's established reputation in their field, this text presents a punchy overview of the leading 50 themes of marketing, each concisely summarized for revision purposes or quick-

learning. While appealing primarily to students undertaking marketing exams, many practitioners will also find this 'glossary of current marketing' hard to resist. The title builds on the earlier works of Dibb and Simkin, whose Houghton Mifflin text, 'Marketing: Concepts and Strategies', is the current business school market leading text in the United Kingdom, while their Thomson Learning text, 'The Marketing Casebook: Cases and Concepts', has just been revised and is the most widely used marketing casebook. From understanding customers, branding and positioning, relationship marketing, social responsibility through to value-based marketing and one-to-one marketing, this book covers all the issues the modern marketer must address. The text itself is organized into short structured chapters, the Briefs, each including: * Core definitions * A bulleted key point overview * Thorough yet concise explanation of the concept and primary issues * Illustrative examples * A selection of examination style case, essay and applied questions * Recommended further reading and sources. Together these offer a rounded, concise and topical appreciation of each theme within a clear and accessible framework designed to aid revision. Also included are revision tips and 'golden rules' for tackling examinations, specimen examination papers with answer schemes, and a full glossary of key marketing terms.

Managing Tourism and Hospitality Services B. Prideaux 2006-09-14 The aim of this book is to enhance theoretical and practical understanding of quality management in tourism and hospitality. It provides a benchmark of current knowledge, and examines the range of research methods being applied to further develop tourism and hospitality service management research. It is hoped that this book will stimulate new research questions by highlighting tensions and challenges in the area.

Debates of the House of Commons of the Dominion of Canada Canada. Parliament. House of Commons 1878

Fast Food, Fast Talk Robin Leidner 1993-08-04 Attending Hamburger University, Robin Leidner observes how McDonald's trains the managers of its fast-food restaurants to standardize every aspect of service and product. Learning how to

sell life insurance at a large midwestern firm, she is coached on exactly what to say, how to stand, when to make eye contact, and how to build up Positive Mental Attitude by chanting "I feel happy! I feel terrific!" Leidner's fascinating report from the frontlines of two major American corporations uncovers the methods and consequences of regulating workers' language, looks, attitudes, ideas, and demeanor. Her study reveals the complex and often unexpected results that come with the routinization of service work. Some McDonald's workers resent the constraints of prescribed uniforms and rigid scripts, while others appreciate how routines simplify their jobs and give them psychological protection against unpleasant customers. Combined Insurance goes further than McDonald's in attempting to standardize the workers' very selves, instilling in them adroit maneuvers to overcome customer resistance. The routinization of service work has both poignant and preposterous consequences. It tends to undermine shared understandings about individuality and social obligations, sharpening the tension between the belief in personal autonomy and the domination of a powerful corporate culture. Richly anecdotal and accessibly written, Leidner's book charts new territory in the sociology of work. With service sector work becoming increasingly important in American business, her timely study is particularly welcome.

Marketing Briefs Sally Dibb 2007-06-07 This revised and updated second edition of Marketing Briefs: a revision study guide gives every marketing student the most comprehensive collection of definitive overviews of every key concept in the subject. The text itself is organized into short structured chapters, the Briefs, each including: * Core definitions * A bulleted key point overview * Thorough yet concise explanation of the concept and primary issues * Illustrative examples * A selection of examination style case, essay and applied questions Together these offer a rounded, concise and topical appreciation of each theme within a clear and accessible framework, designed to aid revision. Also included are revision tips and 'golden rules' for tackling examinations, specimen examination papers with answer schemes, and a full glossary of key

marketing terms.

**Introducing Sociology Using the Stuff of
Everyday Life** Josee Johnston 2017-01-06 The
challenges of teaching a successful introductory
sociology course today demand materials from a
publisher very different from the norm. Texts
that are organized the way the discipline
structures itself intellectually no longer connect
with the majority of student learners. This is not
an issue of pandering to students or otherwise
seeking the lowest common denominator. On the
contrary, it is a question of again making the
practice of sociological thinking meaningful,
rigorous, and relevant to today's world of
undergraduates. This comparatively concise,
highly visual, and affordable book offers a
refreshingly new way forward to reach students,
using one of the most powerful tools in a
sociologist's teaching arsenal—the familiar stuff
in students' everyday lives throughout the world:
the jeans they wear to class, the coffee they
drink each morning, or the phones their
professors tell them to put away during lectures.
A focus on consumer culture, seeing the strange
in the familiar, is not only interesting for
students; it is also (the authors suggest)
pedagogically superior to more traditional
approaches. By engaging students through their
stuff, this book moves beyond teaching about
sociology to helping instructors teach the
practice of sociological thinking. It moves
beyond describing what sociology is, so that

students can practice what sociological thinking can do. This pedagogy also posits a relationship between teacher and learner that is bi-directional. Many students feel a sense of authority in various areas of consumer culture, and they often enjoy sharing their knowledge with fellow students and with their instructor. Opening up the sociology classroom to discussion of these topics validates students' expertise on their own life-worlds. Teachers, in turn, gain insight from the goods, services, and cultural expectations that shape students' lives. While innovative, the book has been carefully crafted to make it as useful and flexible as possible for instructors aiming to build core sociological foundations in a single semester. A map on pages ii-iii identifies core sociological concepts covered so that a traditional syllabus as well as individual lectures can easily be maintained. Theory, method, and active learning exercises in every chapter constantly encourage the sociological imagination as well as the "doing" of sociology.

Outsourcing and Service Work in the New Economy José-Luis Álvarez-Galván 2012-03-15
This book examines the impact of outsourcing on workers and their employment conditions in the new economy. To do so, the call centre industry in Mexico City is analysed through a large

number of in-depth interviews with workers and managers, available statistics and visits to leading firms in the sector. The case of call centres is paradigmatic as it is often seen as a flag-ship industry of the new economy, rapidly growing and subject to high pressures for costs reduction. The Mexican experience is crucially relevant to understand employment conditions in a weak institutional setting where labour protection is low and business competition intense. Overall, outsourcing has gained popularity as a mechanism to deal with the uncertainty of increasingly challenging business environments. Nonetheless, the practice of outsourcing also raises important concerns. This book identifies those managerial practices which have a substantial impact on workers and their employment conditions such as: job designs; customer segmentation; non-standard contracts; intensified supervision; union avoidance; limited career opportunities; and strict social divisions in the workplace. These findings also suggest that a number of practices that were common in the 'old' economy are still dominant in the organisation of work in the twenty-first century. The book is a useful reference for scholars and students concerned with employment and labour studies, economic development, and globalisation.
