City-Centered Marketing: Why Local is the Future of Global Business is a compelling practical analysis of a

new direction of marketing within the context of intensifying urbanization and the shift of global economy from West to East. Philip Kotler, one of the world's foremost marketing experts, and his brother Milton, an international marketing strategist, explain why the future of marketing must focus on top global cities and their metro regions, and not squandered resources on small cities. Marketing is city-centered activity. 600 global cities will contribute 65 percent of the global GDP of \$67 trillion by 2025. The top 100 cities will contribute 25 percent of GDP, and 440 of these top 600 cities will be in the developing world. Top cities have to improve their marketing prowess in compete for the right companies and settling on the best terms. By 2025, the vast majority of consuming and middle-income households will be in developing regions. While New York, Los Angeles, and Chicago will remain major players because of high per-capita GDP and capital and intellectual assets, companies will pay more attention to growing city regions in the developing world. Multinational businesses must change the culture of their headquarters, divisions and branches, as well as their value chain stakeholders to take advantage of these market changes. The book details the strategies for sustainable growth with topics like: Resource allocation in developed versus developing city markets Shifting the focus to city regions instead of central governments The rise of new multinational corporations from developing economies Declining consumer and business growth in developed cities Cities in China, Brazil, India, and throughout the Middle East and Latin America are rising to become major players in the global marketplace. Philip and Milton

Kotler argue that an inversion is taking place, and top cities are growing economically faster than their national rate of growth. These emerging city markets are critical to company growth , and City-Centered Marketing: Why Local is the Future of Global Business provides the vital information and guidelines that companies need to plan accordingly. **Public Health Communication** Robert Hornik 2002-01-01 This volume argues the case that public health communication has affected health behavior. It brings together 16 studies of large-scale communication in a variety of substantive health areas--tobacco, drugs, AIDS, family planning, heart disease, childhood disease, highway safety--prepared by the authors who did the original research. These studies show important effects and illustrate the central conditions for success. The book also includes complementary analytic chapters which provide a meta-analysis of published results, some approaches to developing communication interventions, and alternative methods for evaluation of public health communication projects. Including studies based on communication programs in the United States, as well as projects done elsewhere in the world, including Europe, Africa, Asia and Latin America, this book: \*offers a broad presentation of the alternative research designs that have been used to evaluate public health communication programs; \*includes a great range of approaches from field experiments and natural experiments to simple before-after and complex time series designs, using data gathered from individuals and from archives; and \*utilizes an innovative perspective on how to exercise public health communication from a leading and thoughtful practitioner. As such, it is required reading for scholars,

students, practitioners, and policymakers in public health, health communication, health psychology, and related areas.

*The Circular Economy Handbook* Peter Lacy 2019-12-31 Can we align global production and consumption systems with sustainability? Can business growth actually lead to a healthier planet? Can companies innovate through the circular economy to create competitive advantage and genuine impact? Waste to Wealth proved that the emerging circular economy advantage exists – now Lacy, Long and Spindler show you how to realize it at speed and scale in *The Circular Economy Handbook*. We stand at a crossroads, with rising

geopolitical and geo-economic tensions, massive technological change and a host of social and environmental challenges. We are pushing planetary boundaries to their limits, with climate change and threats to biodiversity and oceans as just a few examples. Significant impacts are already being felt, and both people and planet face potentially catastrophic and irreversible consequences if we don't urgently change our global model and systems. Our current linear "take, make, waste" models of production and consumption will not be sustainable in a world of some 9 billion people by 2050, especially with ever-expanding rates of consumption. Thriving within these dynamics demands more than incremental adjustments to business-as-usual. The circular economy offers a powerful means to decouple growth from use of scarce and harmful resources, enabling greater production and consumption with fewer negative environmental impacts—at the same time, making companies more innovative and competitive. In fact, this book shows that \$4.5 trillion in economic value is at stake. Delivering on the promise of a circular economy demands impact and scale, extending through value chains and, ultimately, disrupting the entire economic system. In *The Circular Economy Handbook*, the authors illuminate the path from insight to action, from linear to circular. With case studies, advice and practical guidance, they show leaders how to pivot towards a holistic circular organization, embedding circularity internally and delivering broad-based system change. With unique insights across business models, technologies, and industries – featuring stories and real-world examples from circular pioneers – this book is the essential guide to

help companies become leaders in the movement to secure the circular economy advantage.

### **The SAGE Handbook of Social Marketing**

Gerard Hastings 2011-11-15 For the first time, this benchmark handbook brings together a systematic framework and state-of-the-art thinking to provide complete coverage of the social marketing discipline. how these have been used in practice, emphasising emerging areas and recent innovations; and - setting the agenda for future research and development in the discipline. For academics, this book will fill the gap in comprehensive social marketing literature, while being of interest to policymakers and post-graduate marketing and health studies students alike as it explores the idea that tools used to market fast-moving consumer goods and financial services can also be applied to pressing social problems.

Up and Out of Poverty Philip T.

Kotler 2009-06-11 In this book, legendary marketing expert Philip Kotler and social marketing innovator Nancy Lee consider poverty from a radically different and powerfully new viewpoint: that of the marketer. Kotler and Lee assess each proposed

path to poverty reduction, from traditional large-scale foreign aid to improved education and job training, economic development to microfinance. They offer powerful new insights into why so many anti-poverty programs fail - and propose a new paradigm that can achieve far better results. Kotler and Lee show how to apply advanced marketing strategies and techniques - including segmentation, targeting, and positioning - to systematically put in place the conditions poor people need to escape poverty. Through real case studies, you'll learn how these marketing techniques can help promote health, education, community building, personal motivation, and more. The authors provide the first complete, marketing-informed methodology for addressing specific poverty-related problems - and assessing the results. They also demonstrate how national and local anti-poverty programs can be improved by more effectively linking government, NGOs, and private companies. Over the past 30 years, the authors' social marketing techniques have been successfully applied to health care, environmental protection, family planning, and many other social challenges. Now, Kotler and Lee show how they can be applied to the largest social challenge of all: global poverty.

**Social Marketing in Action** Debra Z.

Basil 2019-05-24 This textbook provides students with real-world social marketing case studies from different countries and regions around the world, taking learners from classroom theory to practice. The primary objective is to clearly portray to students distinct, identifiable steps that are essential for successful social marketing campaigns. Core social marketing practices are applied to each case to help students master social marketing

principles and apply them to their own real world social marketing activities in order to affect positive social change. This textbook first provides the tools necessary to understand the effective application of social marketing, and then offers 24 case studies exemplifying effective social marketing efforts from all around the world.

Specifically, Part I clearly and concisely explains the principles of social marketing in five chapters:

- Upstream vs. downstream social marketing, SWOT, competition
- Fundamentals of social marketing, ethics
- Formative and Evaluative Research
- Theories applied in social marketing
- A historical perspective on social marketing

Part II features 24 social marketing case studies that demonstrate the application of social marketing principles. All 24 cases follow a consistent structure that includes:

- Background
- Positioning
- SWOT
- Research
- Objectives
- The 4 P's
- Target audience
- Evaluation
- Barriers and benefits
- Discussion
- Competition

This format allows for students and professors to easily and effectively select individual cases and compare between cases. This textbook also allows instructors to encourage critical thinking by having students compare and contrast not only the cases themselves, but the applications used. In addition, teaching guides with answers to discussion questions, suggestions for activities inside and outside of the classroom and further readings are available to assist professors in teaching from this book.

In *Social Marketing to Protect the Environment*, the focus turns to the environment, and how social marketing can be successful to change environmental behaviour. The text begins with a definition of the Social Marketing Model and includes a discussion of various tools that can be used to develop social marketing strategies. It then moves into sections on Residential-Related Behaviours and Commercial-Related Behaviours. These sections follow a consistent format and:

- Describe a variety of environmental issues
- Give examples of the numerous changes in behaviours and/or practices that would contribute to reducing the problem
- Provide mini-cases that illustrate the successful use of social marketing principles along with tools to influence this behaviour in similar situations
- Review what worked and what could have been improved.

A final section provides future directions and recommendations.
